“We are ready and able to provide complete construction and solutions to your everyday construction needs.”

— Ashlar Contractors & Developers, Inc.

Ashlar Contractors & Developers, Inc.

Ashlar has over 25 years of professional experience in all aspects of construction and project management/construction management from pre design, cost analysis, Value Engineering, procurement to complete design phase and master plan, bidding strategy, cost ad budget control, contract negotiation, and problem solving. Ashlar has extensive experience in education public entities such as LAUSD, Larkspur Unified School District, Alameda Unified School District, Conejo Valley Unified School District and other services in DOT, Caltrans (Transportation Engineering to Bridge Structure), City of Los Angeles (LAWA), high rises, industrial, commercial, and criminal justice facilities.

From Service to Solutions

We specialize in metal framing, drywall, taping and painting for residential and commercial buildings. Once your project is underway, you will see first-hand our construction management processes to ensure for a successful project. We schedule routine meetings with your client’s production manager throughout construction to discuss the project, make final selections of finishes and fixtures, and discuss any questions or concerns our client may have. As we work through the project, we talk to our client through each step of the process. Ashlar also provides professional services in design with architects and engineers in all aspect of construction and we monitor the projects from the start to final completion and occupancy.
